

July 23, 2014

Effective immediately, Interalia is pleased to announce the availability of the iProMOH SU. This represents the continuing evolution of the iProMOH portfolio and addresses the mid to top tier of Music-on-Hold and Overhead Music and Messaging applications. It combines the ease of providing audio content via USB sticks with the protection of intellectual property for audio content providers, and industry leading features.

The iProMOH SU has the following feature benefits:

- Update content and firmware via USB flash drive
- Real time music and message mixing
- Mix recorded announcements on live music streams
- Protect contracts with a configurable stale date
- Schedule up to ten (10) messages to occur at preset times and dates
- Shuffle music and/or messages to eliminate repetitive playback
- inContentLock provides the ability to secure playback from a specific audio content provider at a specific customer location
- Easily create and change playback schedules from your desktop
- Ease of installation – iProMOH-SU™ is compatible with any PBX or Key phone system supporting external music on hold, as well as any PA system accepting line-level or speaker level audio inputs.
