

SBX₂

Pre-Recorded Paging & Repetitive Announcements

TAKE CONTROL OF YOUR ANNOUNCEMENTS

When it comes to repetitive announcements, automation is a life saver. With the SBX₂, it's also easy. Improve the quality and clarity of your repeated messages and save on time, staff, and effort with the SBX₂ Pre-Recorded Paging and Repetitive Announcements application.

THE KEY TO CONSISTENCY

Easy to Manage

The SBX₂ lets you manage your announcements through a simple user interface. Just load up the Message Manager software to manage your audio files. Remote access is available via Ethernet, telephone, and modem connection.

Applications: Manage announcements remotely, make changes without technical assistance.

Always Consistent

An automated announcement is a consistent announcement. Use the SBX₂ to deliver calm, clear messages that are easy to comprehend, even in emergency situations.

Applications: Ensure consistent messaging, improve listener comprehension.

Zones and Languages

Craft messages that meet the needs of each zone or room that your announcements play in. You can also set your announcements to play in multiple languages to increase your overall reach.

Applications: Create area-specific announcements, address international audiences.

You're in Control

SBX₂ announcements will play in the order that you set them, giving you complete control over the cycle of your repeated announcements. Combine them with background music for an uninterrupted audio stream.

Applications: Cycle through sale announcements, instruct listeners to repeat an action.

APPLICATION REQUIREMENTS

The Application Requirements are connectivity to Paging System.
